VDP Android Mobile APP

VDP iPhone Mobile APP

General Set-Up Steps for 2-Easy Mobile APP VDP Version

1. Download the APP (there are three options to access the download):
 - From the mobile device where the APP is to be installed, scan the appropriate QR code on this page – the default browser will link directly to the APP location
 - Enter “2-easy app” in the mobile browser, from the search results select either App Store or Google Play – this will link directly to the APP location
 - From the mobile device, use the download link provided on the NYWINT.com website (Mobile APP page)
2. On each smart device, scan the QR Code to connect to the Apple APP Store or Google Play, then download and activate the APP.
3. Prepare the SIP configuration on the master Monitor Station. Refer to the manual for your monitor type.
4. Use the Monitor Station menu to navigate to the QR code screen. The Monitor Station will display a unique QR code with all set-up data embedded. Use the APP to link to the Monitor by scanning the QR code. Do this for each mobile device.
5. Complete any settings needed for the system configuration.
