- The talking will stop immediately, call tone sounds in normal.
- The video image from the door station is displayed on the screen, talking,unlock,capture images/videos are available.

6. Monitoring

This section can be used to monitor your home by enabling one of the cameras inside the apartment, the common areas (e.g. garages, garden), and at the entrance.

1. From the main menu, tap **"Monitor"** icon.
2. Select the desired tap.
 - Allows you to select door station camera or IP camera(if the system installs multi door station or IP camera) .
3. Select the desired camera.
4. When finished, tap  button on panel.

* During monitoring, images can be viewed, but audio cannot be heard.

Available functions during monitoring:

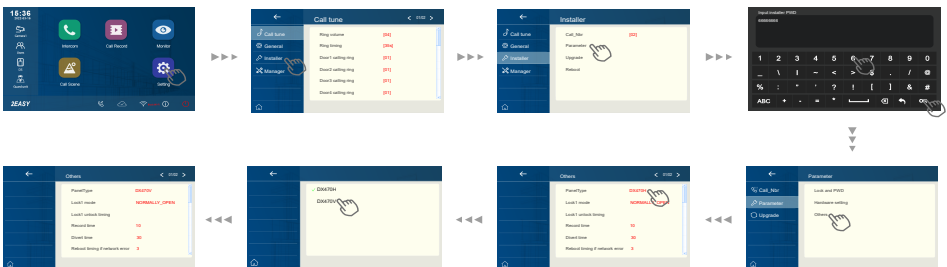

- Door release
- Manual recording

Note: Tap monitor quick actions to monitor corresponding camera directly(If the monitor quick actions is set on the shortcut windows).

7. Main Menu Switching

This section can be used to switch the menu for DX470H & DX470V.

The Steps are as follows:

After restart, you can switch to the new menu.

***All of the following have been explained by taking the DX470H menu as an example.**

8. Favorite Setting

This section can be used to set your favorite.

1. From the main menu, tap **"Monitor"** icon.
- A list of available setting categories is displayed.
2. Select "Monitor" item.
3. Click the upper left corner of the item you need to select, and then the "★" icon will appear.
4. If you need to cancel, click the upper left corner again.

9. PIP View

Precondition: this function requires the system to access the cameras or set the camera proxy settings.

The picture-in-picture display allows the user to see two images from different sources at the same time during the call, which is convenient for the user to see the visitor intuitively and concretely.

Press call button
on door station

Feature of PIP view:

- in call mode
- Picture in picture to avoid dead corner
- Able to watch both views from door station and IP camera
- Swap the two images by a simple touch

10. Quad View

Precondition: this function requires the system to access the cameras or set the camera proxy settings.

The Quad display allows the user to view four images quickly and simultaneously from different video resource, and to quickly switch & zoom in on a screen by one click.

Feature of quad view:

- In monitor mode
- Able to display four images on a screen
- switch seamlessly between One-view and Quad-view
- free to zoom in any views

11. Making Calls

You can call other residences, common area phones or facility staff office, and even other rooms in your own residence.

whichever monitor answers the call, you can use many of the features described in feature available while talking on a call.
